**Subject:** ACT - Joe

Dear College Review,

I am writing to tell you about the awesome experience my son had with your private tutoring classes. Before signing up for the tutoring, my son took the ACT and did not do very well. We signed up for the private classes and he increased his score by **six** points! We were amazed by his results. It opened so many doors for college and he is now going to a Division 1 school to play football. This would not have been possible without this tutoring.

Susan, from the college review, not only tutored him but went above and beyond to set him up for success. She did an absolutely wonderful job of preparing him for the ACT. She spoke with his high school counselors, putting in place an accommodation that I wasn't even aware he was eligible to have.

My son not only went up six points on his ACT, but has been on the honor roll three times since being tutored by Susan. He was never before on the honor roll. He also got a partial academic scholarship because of his score. Right there we got our money back! She taught him study skills that will be invaluable in college. I **highly** recommend the college review for any student interested in increasing their score. The higher the score, the more academic scholarship money! It is a win-win situation!!

Ever so grateful,  
Eileen Helton
